Mohammad Wasiq

has successfully completed the online Professional Certificate

Machine Learning with Scikit-learn, PyTorch & Hugging Face

The Machine Learning with Scikit-learn, PyTorch & Hugging Face Professional Certificate equips you with advanced skills in applied machine learning, deep learning, and generative AI. Through five courses, you'll gain proficiency in supervised and unsupervised learning, time series forecasting, reinforcement learning, and NLP. You will acquire expertise in ML models, AutoML optimization, and text processing. Training in PyTorch and Hugging Face enables you to design and implement deep learning solutions for computer vision and NLP. Projects cover generative models like GANs and VAEs, and complete ML workflows from problem definition to deployment. You'll create robust AI solutions and drive innovation in your professional roles.

This certificate attests to the learner's completion of an online program delivered via Coursera. It does not constitute formal enrollment at any university or entity and does not itself grant academic credit, grades, or a degree. Institutions or organizations may, at their discretion, recognize this learning toward their own programs or credentials.
